Premium private cloud services at predictable cost-effective rates

Gain control over security and compliance

enzu™
IT Infrastructure, simplified

Enzu Infrastructure as a Service

Built to order, right-sized, personal service

Enzu is a global cloud services provider that puts you in control of your IT infrastructure with leading capabilities in networking, cloud and security. We offer no fluff, build-to-order cloud, infrastructure as a service with Enzu TruCloud™, a self-service cloud control console, and other services to help IT and business leaders succeed including cloud migration, cloud optimization and application modernization.

Cloud Services Designed for Busy IT Leaders

It's more of a challenge than ever to run IT Operations and keep up with the ever-changing technology landscape. From finding and keeping talented IT staff, shrinking budgets and huge vendors treating you like a number, often the modern cloud experience just lacks. Well we have been in the trenches and seen firsthand the hurdles that IT leaders face when moving to cloud. Things like skyrocketing costs, complexity, performance and security issues. So we built a different kind of cloud company – a transparent one that keeps you in control, provides high quality infrastructure and doesn't unnecessarily complicate or upsell. Our billing is simple and straight forward, no surprises.

We Make Cloud Easier and More Affordable

In today's competitive digital world, your business performs only as well as your IT infrastructure. At Enzu, we provide premium cloud services and run your IT infrastructure like our lives depend on it. That's what families do. We started as a family IT infrastructure business and still operate with family-based values now delivering them at global scale.

Eliminate skyrocketing and hidden cloud costs. Gain control over assets and budgets with Enzu TruCloud™ self-service cloud control plane along with budget friendly, transparent and predictable pricing. Experience Infrastructure as a Service as it was meant to be, simplified.

Focus on Business Not Your Infrastructure

Achieve cloud efficiency, with less burden on your IT staff. Accelerate the deployment of new IT services and realization of cloud benefits.

Build-to-Order Private Cloud Platform

Right sized infrastructure
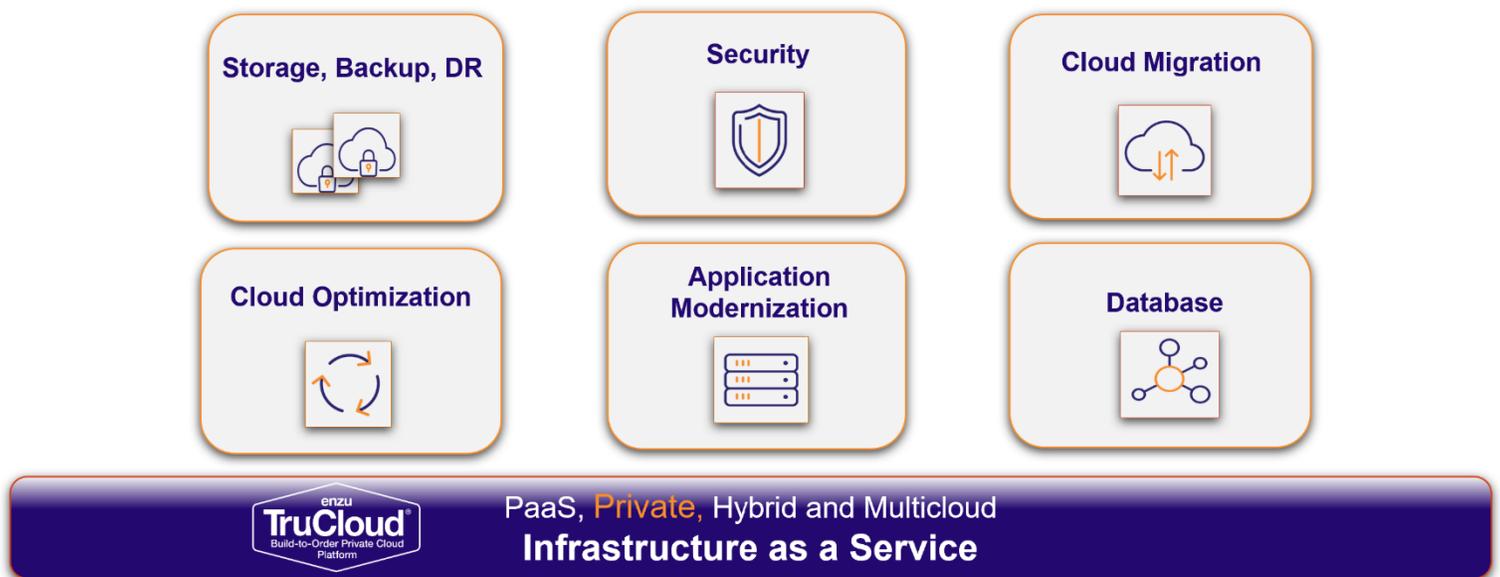

Transparent, predicable pricing

Deploy in Confidence with Expert Cloud Services

Now you can enjoy data center speed, cloud agility, and an as-a-service model. Transform the way you do business with one experience and one partner across clouds. Whether considering public cloud or taking a hybrid cloud approach, Enzu can help you design, implement and run a cloud-ready infrastructure that will unlock your vision and unleash unprecedented business performance. We understand that IT organizations may not have all the foundational components required to operate successfully in the cloud. Enzu provides organizations the capability to confidently operate in a cloud environment with premium automation-driven infrastructure, incident management, continuous monitoring and compliance.

Cloud Services Portfolio Engineered for Business Results

- Achieve cloud efficiency with less burden on IT staff

- Accelerate the deployment of new customer services and realization of cloud benefits

- Eliminate IT budget waste and bridge the cloud knowledge gap with Enzu expert services
